

# Revision History

## **BH66F2650/60      Body Fat Measurement Flash MCU**

### **Revision # 1.60    Modifications made on September 07, 2023**

- The part number BH66F2650 device EOL description was added.

### **Revision # 1.50    Modifications made on February 23, 2023**

- The Storage Temperature Range was modified.
- The 32.768kHz Crystal Recommended Capacitor Values table was modified.

### **Revision # 1.40    Modifications made on December 29, 2021**

- The part number BH66F2650-8/BH66V2650-8 device was removed.
- The SCC Register section a note description was added.
- The UART External Pin Interfacing section was modified.
- The Instruction Set and Instruction Set Summary sections were modified.

### **Revision # 1.30    Modifications made on December 2, 2019**

- In the Memory Characteristics section, the Ep parameter specification was modified.

### **Revision # 1.20    Modifications made on May 6, 2019**

- In the Standby Current Characteristics, the parameters for the SLEEP Mode WDT Off condition were modified.

### **Revision # 1.10    Modifications made on January 4, 2018**

- In the Pin Assignment section, the 48-pin LQFP-B part number was modified.
- In the 24-bit A/D Converter Electrical Characteristics section, the LDO Droppout Voltage, External Reference Input Voltage and Common Mode Voltage Range values were modified.
- In the ADCR1 Register section, the Bit 7~5 description was modified.

### **Revision # 1.00    This was posted on August 16, 2017**
